Then, asked shareholders if there was any question. There was 1 shareholder inquiring which can be summarized as follows:

Mr. Anu Wongsarakij (By Translation) / Shareholder:

1. What causes a decrease in profit from the past performance?
2. There is an increase in production costs. How will you manage?
3. How do you estimate inventories and impairment of assets?

Mr. Suchai Narongkananukul / Chairman of the Executive Committee and Managing Director

Since in 2017, the company had a profit from selling assets of 20.97 million Baht, while last year was only a little over 500,000 Baht, when combined with other income, such as rent, dividends received, etc. makes the total amount of other income decreasing approximately by 19 million Baht. In addition, the increasing exchange rate in all currencies caused a decline in export to foreign countries by about 12 million Baht, resulting in lower profits

Generally, profitability rate is still normal, there will not be much of concern if there are not external factors such as trade war and fluctuation of exchange rate. However, the company closely monitors the situation. Therefore, there should not be any problem.

Mr. Anu Wongsarakij (By Translation) / Shareholder:

Exchange rate problems are worrisome because now the Baht is quite strong. Mr. Anu asked about the associated company. There was a recognition of loss from the associated company. How will the company manage? Please explain the details of the income recognition of the associated companies.

Mr. Chanin Ratanavijai / Director and Corporate Secretary

The reason for the loss of associated company in Indonesia missing the expectations were the change in the regulation of functional currency to Indonesian Rupiah and the weakening of Indonesian Rupiah currencies had a huge impact to its loan in the USD denomination. In addition, the operating results of associated companies have also been affected by the economic and lower growth of automobile. The company and joint venture partners have a guideline to reorganize its funding sources structure. It is being studied to reduce the exchange rate risk by replacing some borrowing in local currency along with increasing capital to reduce interest burden. In addition, there are plans to increase product categories with higher margins, and may invest more in the future.

Mr. Suchai Narongkananukul / Chairman of the Executive Committee and Managing Director, added

In regard to expenses in the past year, the company had invest in machinery, a construction and also invest in new products. They added more depreciation around 10 million Baht and the company will continue to invest and develop further this year.

Why did the company set a compensation limit of up to 12 million Baht but actually paid only 8 million Baht or it accounted for less work than we expected.

Mr. Chanin Ratanavijai / Director and Corporate Secretary

In determining the compensation requested for approval by the shareholders is the same as setting a budget for each year, but the actual payment will depend on the consideration of the Remuneration Committee. It will be considered from the operating results, the performance of the directors, taking economic factors in to account, and compare with the compensation of similar industries. It is also a part of the culture of the Saha Group that is not paid as high as Budget, however, if the company's performance exceeds the actual expectations Believes that the Remuneration Committee will seek approval from the shareholders' meeting.

Mr. Anu Wongsarakij (By Translation) / Shareholder:

If the next year's performance is better the limit may be increased as well because there are 2 parts. First is the meeting allowance which is somewhat fixed and depends on the meetings, quarterly, and reward. What the compensation will normally depends on the performance or the dividend? Some companies set it depend on dividends paid to shareholders.

Mr. Chanin Ratanavijai / Director and Corporate Secretary

The company put the weight more to the operating results than the dividend payment. It could lead to a conflict of interest in regard to consideration. A company could have pay a large amount of dividends from retained earnings. The committee looks at the overall picture. The important part of the company is to retain the important personnel with the company.

Mr. Suchai Narongkananukul / Chairman of the Executive Committee and Managing Director, added

As you know, The Stock Exchange of Thailand Board of Directors expect listed companies to perform more duties, and assume more responsibilities therefore increasing actions such as risk management Anti-corruption and also wishes to the committee to hold more meetings. That may be further determined in the future if it is too rigid it may cause problems in the future. The company may have to call for another shareholder meeting.
